

# A758

## Thermal/Impact Hybrid Printer with Clamshell® Receipt

TPG's multifunction A758 sets the standard for hybrid transaction printers!

The see through window on the check flip version means you will never lose sight of the check.

### Fast Processing

At 40 lines per second thermal, and 4.8 lines per second impact, the A758 printer is one of the fastest in its class. What's more, the A758 includes an integrated MICR reader for fast and accurate check verification. You can save even more time with the optional check flip capability, allowing hands free printing on both sides of the check. This unique one-step check processing allows more time to be spent on customer service and speeds up the transaction.

### High Volume Transactions

Use the A758 wherever you have high volume and need quick transaction processing for department, discount, specialty, grocery, and drug stores. In addition, the A758 comes with the TPG standards you have come to expect. Features such as the original Clamshell® drop-in paper loading and the snap on ribbon cassette. Large standard flash memory allows you to print custom marketing messages, seasonal offers, special promotions and logos at a crisp 203 dots per inch (DPI).

### Compatibility

Backwards compatible with the A756, the new TPG A758 automatically prints A756 graphics at the higher resolution of 203 DPI while maintaining exact proportions. The A758 also includes advanced features such as enhanced print modes, remote diagnostics, single button programming, and the largest paper capacity in its class.

**The A758 includes advanced features such as enhanced print modes, remote diagnostics, single button programming, and an expanded 90 mm paper capacity, the largest in its class.**
